

Keeping up to date and ensuring that your I.T. systems are working efficiently for you is core to what we do and therefore provide a professional consultancy service that you can call on us as often or as little as you like. We will help you keep on top of your systems before it becomes too late!

- I.T. consultancy at your fingertips
- LAN audit
- Security audit
- Vulnerability testing
- Full project management
- Installation

## LAN audit

A practical, introductory process required for all businesses, no matter how big or small. This way, we can really get to know your network and your needs. This investigation covers everything, including core network functions, servers and workstations

## Core network

Switches/Hubs  
Routers  
Firewalls

## Server

Memory utilisation  
Hard disk availability and error checking  
Processor utilisation  
Back up confirmations  
Virus update confirmations  
Firewall/security check  
Asset management  
Error log analysis  
Data structure analysis  
Remote working evaluations  
Upgrade capabilities

## Individual workstation

Virus check and update confirmations  
Firewall/security check  
Memory utilisation  
Hard disk availability and error checking  
Problem identification and solving  
Configuration check  
Data structure analysis  
Troubleshooting  
Application management
