

We appreciate that every company is different, and your businesses I.T. needs may be very different to others. So the systems we choose for you, including all hardware and software are the ones that will fit your business needs in the best way.

Competitive rates

The relationships we have with a range of suppliers means that we can get extremely competitive prices for you. We are vendor independent and buy directly from a range of manufacturers and distributors throughout the UK. We'll ensure that we buy what is best for your needs, not what is easiest to get.

Buying through LuxTech will mean that you don't have to chase up your purchases or quibble with warranties. We'll manage all of that for you, and keep you fully updated.

And our service doesn't simply end with the purchase. We install, configure and test all the hardware and software we buy on your behalf.
